

North Star Equipment

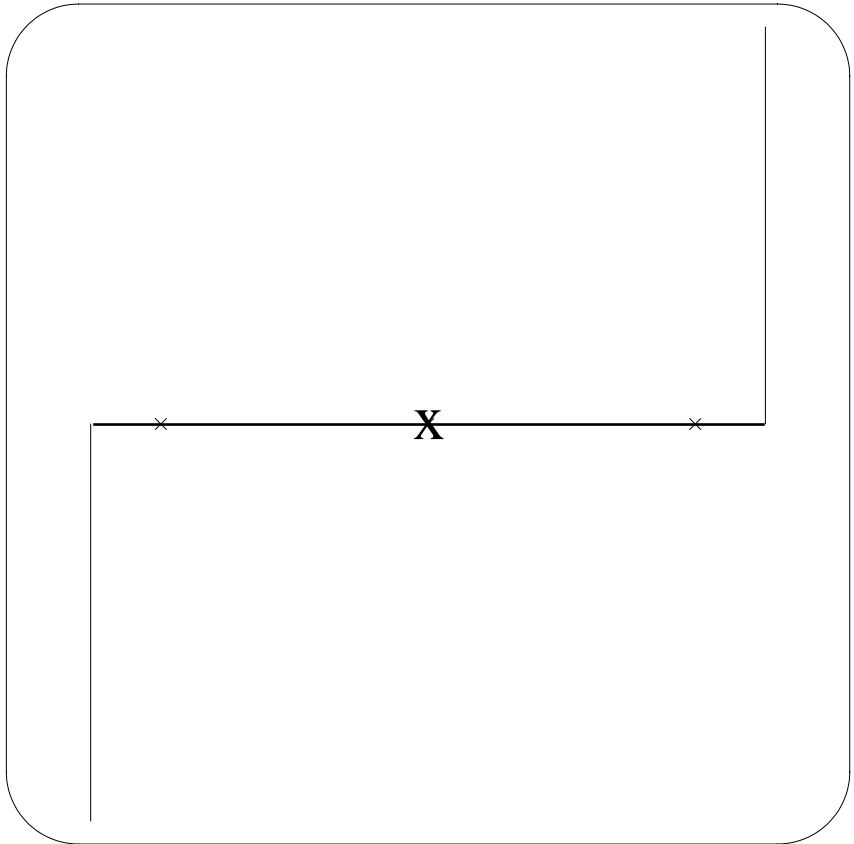

CUSTOM EXTRUDER DIE ORDER FORM

Use this side for North Star Standard (4") dies and the reverse for Super (6") dies.

DIRECTIONS: Simply draw on the appropriate outline exactly what you want in the size you want your extrusion to be. Center your die on the "X". Please make the clearest, sharpest lines you can. Ink from a fine point drawing pen is ideal. Pencil can be very hard for us to follow, especially if it has been erased and redrawn several times. (You might want to practice on another sheet of paper first.)

The z-shaped line on the Standard outline and the diagonal line on the Super outline represent die brace paths. Ignore them if you are designing a solid die.

If you give a phone number we will call you if we do not understand what you want or if we have a suggestion about it.

Send this drawing to:
North Star Equipment
P.O. Box 189,
Cheney, WA 99004

or fax it to either (800) 447-3293 or (USA) (509) 235-9203. Allow 14 days.

Fill out only the side you are using. Please type or print clearly as possible.

We will call, e-mail or fax a quote if requested and for payment information if required.

SUPER

For any die other than for North Star extruders, use a blank paper. Trace the outline of any die for that extruder or mill. Be sure to include the mounting holes. Draw the extrusion you want in life size on that tracing and send or fax it to North Star Equipment. We will contact you with a quote.

Fill out only the side you are using. Please type or print clearly as possible.
